## Politics & government

### The environment

**George Monbiot** writes a weekly column for The Guardian, and is the author of a number of books, including *Heat: How to Stop the Planet Burning*, *The Age of Consent: A Manifesto for a New World Order*, *Captive State: The Corporate Takeover of Britain* and *Feral: Searching for Enchantment on the Frontiers of Rewilding*. He is the founder of The Land is Ours, a peaceful campaign for the right of access to the countryside and its resources in the United Kingdom. He was presented with a United Nations Global 500 Award for outstanding environmental achievement by Nelson Mandela.

## How Did We Get Into This Mess?

Politics, Equality, Nature

14 February 2023

*Where have we gone wrong, and what can we do about it?*

George Monbiot is one of the most vocal, and eloquent, critics of the current consensus. *How Did We Get into this Mess?*, based on his powerful journalism, assesses the state we are now in: the devastation of the natural world, the crisis of inequality, the corporate takeover of nature, our obsessions with growth and profit and the decline of the political debate over what to do. While his diagnosis of the problems in front of us is clear-sighted and reasonable, he also develops solutions to challenge the politics of fear. How do we stand up to the powerful when they seem to have all the weapons? What can we do to prepare our children for an uncertain future? Controversial, clear but always rigorously argued, *How Did We Get into this Mess?* makes a persuasive case for change in our everyday lives, our politics and economics, the ways we treat each other and the natural world.

## Fighting in a World on Fire

### The Next Generation's Guide to Protecting the Climate and Saving Our Future

Verso Books (Marston Book Services)

07 February 2023

*An argument for bold action to halt climate destruction, adapted for young people from Andreas Malm's best-selling book by an experienced educator.*

Young people are inheriting a world of climate catastrophe. Young people are also one of the strongest forces leading movements for climate justice, and to halt the fossil fuel emissions that are making our Earth unlivable. As Greta Thunberg and the Fridays for the Future movement have made clear, solutions offered by adults are far too little, far too late: the measures in unenforceable international agreements won't halt our reliance on fossil fuels, or take the drastic steps humans need to take in order to keep our planet livable. What kinds of drastic steps are needed? What kind of bold actions can the climate justice begin using to bring a stop to climate destruction, and that can be employed alongside existing strategies of mass protest, awareness, and legal appeals? Why does our society consider profit for oil companies more important than the future of young people and the health of our shared environment? In this adaptation of Andreas Malm's best-selling book on the need for a bolder, more confrontational climate justice movement, these urgent questions are brought to the most important audience of all: those who are growing up in a world on fire.

## Stopping Oil

### Climate Justice and Hope

Pluto Press (Marston Book Services)

20 January 2023

*Lessons learned from the powerful climate justice campaign in Aotearoa New Zealand*

Stopping Oil dives into the story of how deep-sea oil exploration became politicised in Aotearoa New Zealand, how community groups mobilised against it and the backlash that followed. It is also a story of activists exercising an ethic of care and responsibility, and how that solidarity was masked and silenced by the neoliberal state. As Aotearoa New Zealand began to pursue deep-sea oil as part of its development agenda, a powerful climate justice campaign emerged, comprising of a range of autonomous 'Oil Free' groups around the country, NGOs like Greenpeace, and iwi and hapu (Maori tribal groups). As their influence increased, the state employed different tactics to silence them, starting with media representations designed to delegitimise, followed by securitisation and surveillance that controlled their activities, and finally targeted state-sanctioned violence and dehumanisation. By highlighting geographies of hope for radical progressive change, the authors focus on the many examples of the campaign where solidarity and political responsibility shone through the repression, leading us towards a brighter future for climate justice across the globe.

Named a 'Best Book of the Year' by Kirkus Reviews 'Urgent and eye-opening, the book serves as a loud-and-clear alarm.' - The Boston Globe From an MIT scientist, mounting evidence that the active ingredient in the world's most commonly used weedkiller is contributing to skyrocketing rates of chronic disease. Glyphosate is the active ingredient in Roundup, the most commonly used weedkiller in the world. Over 300 million pounds of glyphosate-based herbicide are sprayed on farms - and food - every year. Agrochemical companies claim that glyphosate is safe for humans, animals and the environment. But emerging scientific research on glyphosate's deadly disruption of the gut microbiome, its crippling effect on protein synthesis and its impact on the body's ability to use and transport sulfur - not to mention several landmark legal cases - tells a very different story. In Toxic Legacy, senior research scientist Stephanie Seneff, PhD, delivers compelling evidence based on countless published, peer-reviewed studies - all in frank, illuminating and always accessible language. As Rachel Carson did with DDT in the 1960's with Silent Spring, Seneff sounds the alarm on glyphosate, giving you guidance on simple changes you can make right now and essential information you need to protect your health, your family's health and the planet on which we all depend. 'A game-changer that we would be foolish to ignore.' - Kirkus Reviews (starred) 'Toxic Legacy will stand shoulder to shoulder with Rachel Carson's Silent Spring. [This is] unquestionably, one of the most important books of our time.' - David Perlmutter, MD, #1 New York Times bestselling author of Grain Brain 'Dr. Seneff's work will change the way we all think about food.' - Mark Hyman, MD, New York Times bestselling author
